

# CARL-DIV-01

## Miyota caliber 9039 - Instruction manual

### IMPORTANT:

To ensure optimum water resistance, the crown of the CARL-DIV-01 is screwed.  
Before any time resets or adjustments, remember to unscrew it.  
Do not forget to screw it back in after any manipulations, otherwise the watch may no longer be water resistant. This would cause irreparable damage.

### 1/ DISPLAY AND FUNCTIONS

### 2/ WINDING THE MAINSPRING

Automatic winding watch can be also manual-winded by turning the crown in "A" position.  
Wind 15/20 times clockwise until second hand starts to move naturally.

### 3/ ADJUSTING TIME

Pull the crown in "B" position and adjust the standard time.
